Do you aspire to work in an international, innovative organization and contribute to a healthier environment? And are you looking for a workplace which encourages entrepreneurship and personal development?

“We challenge you to step into our world”

Logistics Coordinator

Location: Manchester

Company Profile

As an Internationally recognized company, the N+P Group has 25 years of experience in contributing to a better, greener environment. We do this by being progressive, innovative and a market leader in the alternative fuels and waste management sector.

We develop, coordinate and implement total concepts for the recycling and treatment of industrial residues. We convert waste that can no longer be recycled and manufacture this waste into alternative fuels and secondary raw materials, which can replace polluting fossil fuels and primary raw materials. Our products are used at various large industrial installations such as cement kilns, power stations or blast furnaces. Use of these products will lead to a significant level of CO₂-reduction. It is our ultimate goal to make the use of fossil fuels redundant.

N+P source and supply residual waste to the domestic and international Energy-from-Waste sector. Alternative fuels production and supply are not the only things we do. N+P provide a consultative approach to develop our customers in recycling and recovery of their waste. We also manage and monitor quality, co-ordinate logistics, manage storage capacities and administrate permits.

Our organization is fast growing and dynamic, with many large multinationals as our customers. Our head office is in Nieuw Bergen, the Netherlands. For more information we recommend you visit the following websites or social media pages:

Company Culture

We are an innovative, dynamic and professional company. People like working for N+P due to diverse challenges and opportunities to develop their personal and professional skills. Combined with the positive mindset in the organization which makes N+P a great place to work!

(Main) tasks and responsibilities of the Logistics Coordinator

Based in central Manchester, this support function role to N+P's UK operations and commercial division is integral to the effectiveness of N+P's service delivery, commercial performance and stakeholder relations.

The purpose of the Logistics Coordinator is to co-ordinate and monitor UK logistics in accordance with N+P commercial activities. The role of the Logistics Coordinator is to manage the day to day planning, administration and co-ordination of residual waste supply to N+P's UK alternative fuel production facilities and commercial projects, coordinating and managing the associated logistics provisions and provide the UK organization with commercial support. You be responsible for building strong commercial relationships with UK logistics providers, N+P customers and suppliers.

Main tasks and responsibilities

- Manage logistic activities in accordance to contractual arrangements (own planning responsibilities)
- Maintain contact with (logistic) suppliers and buyers
- Request proposals from and conduct (commercial) negotiations with carriers
- Improve and optimize the logistic process in order to increase sustainability and reduce costs
- Cultivate and produce reports in accordance with reporting structure to the Operations Manager
- Research new transport options and optimize existing routes
- Support project managers: make offers for customers, oversee progress, etc.)
- Report deviations from agreed volumes to all stakeholders in time
- Maintain the Customer Relations Management system and the Business Central system

Requirements of the Logistics Coordinator

To be a high performing Logistics Coordinator, you are results oriented, accurate, punctual, commercially sound and you have excellent communications skills. You bring enthusiasm, energy and have the growth potential to develop in this fast pace environment as the N+P UK Organization grows. You are a real team player, who is also capable of working independently and is a high performer. You are ambitious and have a high level of organizational awareness. Furthermore the Logistics Coordinator is to be proactive and knows how to establish and provide service excellence.

Requirements

- A bachelor's degree in Logistics or Supply chain management (or related)
- Working experience in a similar role, knowledge of logistics
- Knowledge of the waste management sector is an advantage
- Experience of managing high volume bulk haulage logistics in the waste or biomass sector is an advantage
- Experience of co-ordinating and planning logistics for high volume waste supply contracts in the waste or biomass sector is an advantage
- Good Microsoft Office Word, Excel, and Outlook skills
- Excellent knowledge of English language (in word and writing)

Remuneration

Despite our fast growth, N+P remains a welcoming company with well-motivated and enthusiastic employees. The successful applicant will be employed as a full time, permanent employee. The financial package will be competitive. N+P support personal growth and development, the company offers training, sponsorship for further education such as a degree or masters and meaningful career development within the company.
